InvestorMe

Working more than 10 years in the financial industry I have realized that investors simply lose lots of money due to poor advice, complicated products and unnecessary risks. As an independent advisor, I teach my clients on a daily basis and realize the benefit of this. With my online platform, I want to educate and work with investors in a simple and useful way, so they don't fall for costly tricks, protects their wealth better and become a better investors.

Qard

We will be providing an online platform for crowdlending (such as lendix, advanon) with contracts based on Islamic Finance. In countries such as France and Germany a rising middle class of Muslims is left with poor alternatives to traditional banking and as much as 40% avoid investment at all for lack of a solution. Traditional banks are very reluctant to offer this services and risk their reputation, leaving therein a gap in the market small players such as startups can fill thanks to tech.

Quantworks

Quantworks is a Zürich-based startup specializing in context analytics. Our solutions turn news and financial information into insight by combining finance, data and computer science. We replace information overflow by a quick visual assessment of the market situation. We address behavioral bias by analysing investment outcomes. Our solutions empower investment decision makers and their distribution channels: we target next-generation (“bionic”) robo advisors and online brokers.

Quotip

Quotip helps Wealth Managers (buy-side) generate additional, diversified returns with the artificial intelligence-supported selection of Structured Financial Products (STPs). Quotip’s machine learning based algorithm identifies opportunistic constellations in the market combines them with restrictions and risk metrics of an existing portfolio allocation and identifies matching product parameters for the issuance of a bespoke STP. Quotip’s ultimate mission is to utilize the full potential of the derivative component of STP’s, make these products more accessible and free from conflicts of interest.

Smolio

With Smolio investors who think long term have a complete overview of their portfolio with relevant information. They get notifications when significant changes occur and personal recommendations according to their profile. Thus, Smolio supports ordinary investors in keeping track of their investments and take qualified and unbiased decisions. We designed a platform that prevents biases in financial decision making and supports active involvement through gamification elements.
